

## Data on ORY-1001 to Be Presented at the **AACR Annual Meeting 2016** in New Orleans

**BARCELONA, SPAIN and CAMBRIDGE, MA, April 11<sup>th</sup>, 2016** – Oryzon Genomics (ISIN Code: ES0167733015), a clinical-stage biopharmaceutical company leveraging epigenetics to develop therapies in oncology and neurodegenerative diseases, today announced that data on ORY-1001 will be presented at the American Association for Cancer Research (AACR) Annual meeting to be held at the Ernest N. Morial Convention Center in New Orleans, Louisiana in April 16-20, 2016.

Roche and Oryzon will jointly present data on research performed with Oryzon's epigenetic drug ORY-1001 (RG6016) in a poster presentation entitled *"Neuroendocrine gene transcript expression is associated with efficacy to lysine-specific demethylase-1 inhibitor RG6016 in small cell lung cancer-derived cell lines"*. The company will be represented at the meeting by its CSO, Dr. Tamara Maes.

ORY-1001 (RG6016), Oryzon's first clinical asset, is a highly potent and selective Lysine Specific Demethylase-1 (LSD1) inhibitor for the treatment of leukemia and other malignancies, currently in Phase I/IIA in Acute leukemia, that was partnered with Roche in a global deal in 2014. Beyond hematological malignancies, LSD1 inhibition has been proposed as a valid therapeutic approach in some solid tumors such as Small cell lung cancer (SCLC). SCLC represents 15% of lung neoplasms and is an aggressive malignancy with limited treatment options. Survival in refractory settings is typically less than one year, exemplifying the need for more effective therapeutics. Recent published results suggest that epigenetic modulation mediated by LSD1 inhibition may be effective to treat SCLC.

Lasting five days, the AACR Annual Meeting is an important event for cancer researchers and the broader cancer community. This year's theme, "Delivering Cures Through Cancer Science," reinforces the inextricable link between research and advances in patient care.

### **About Oryzon**

Founded in 2000 in Barcelona, Spain, Oryzon (ISIN Code: ES0167733015) is a clinical stage biopharmaceutical company considered as the European champion in Epigenetics. The company has one of the strongest portfolios in the field and a clinical asset already partnered with Roche. Oryzon's LSD1 program is currently covered by 20 patent families and has rendered two compounds in clinical trials. In addition, Oryzon has ongoing programs for developing inhibitors against other epigenetic targets. The company has a strong technological platform for biomarker identification and performs biomarker and target validation for a variety of malignant and neurodegenerative diseases. Oryzon's strategy is to develop first in class compounds against novel epigenetic targets through Phase II clinical trials, at which point it is decided on a case-by-case basis to either keep the development in-house or to partner or out-license the compound for late stage development and commercialization. The company has offices in Barcelona and Cambridge, Massachusetts. For more information, visit [www.oryzon.com](http://www.oryzon.com).

**FORWARD-LOOKING STATEMENTS**

This communication contains forward-looking information and statements about Oryzon Genomics, S.A., including financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, capital expenditures, synergies, products and services, and statements regarding future performance. Forward-looking statements are statements that are not historical facts and are generally identified by the words “expects”, “anticipates”, “believes”, “intends”, “estimates” and similar expressions.

Although Oryzon Genomics, S.A. believes that the expectations reflected in such forward-looking statements are reasonable, investors and holders of Oryzon Genomics, S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Oryzon Genomics, S.A., that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the documents sent by Oryzon Genomics, S.A. to the Comisión Nacional del Mercado de Valores, which are accessible to the public.

Forward-looking statements are not guarantees of future performance. The auditors of Oryzon Genomics, S.A. have not reviewed them. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date they were made. All subsequent oral or written forward-looking statements attributable to Oryzon Genomics, S.A. or any of its members, directors, officers, employees or any persons acting on its behalf are expressly qualified in their entirety by the cautionary statement above. All forward-looking statements included herein are based on information available to Oryzon Genomics, S.A. on the date hereof. Except as required by applicable law, Oryzon Genomics, S.A. does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
